## FEATURED PROJECTS

---

### Konfipay

<https://portal.konfipay.de>

Enterprise-scale online banking platform built on the EBICS standard. Manages hundreds of bank accounts across 13+ banks, provides a REST API for ERP/automation integration, multi-tenant architecture with a dedicated database per customer, automated signing and submission of SEPA payment orders, and processing of camt/MT940/pain files. Integrates with PayPal and Atlassian/Jira. Supports FinTS/XS2A (Open Banking). Deployed on Azure (SaaS) and Swisscom Docker (konfipay.ch) for Swiss customers requiring data sovereignty.

*C#, .NET 9, ASP.NET Core, Blazor WASM, SQL Server, Hangfire, Serilog, EBICS, FinTS/XS2A, Azure, Docker, PayPal API, Jira API*

---

### Order

<https://cisbox-order.cisbox.com/>

Internal order management system for businesses. Built with Ruby on Rails 7, integrates Elasticsearch for real-time order search and filtering. Supports PDF/Excel report export, background job processing with Sidekiq, user authorization with Devise + Pundit, and SFTP connectivity for data synchronization.

*Ruby on Rails 7, MySQL, Elasticsearch, Sidekiq, jQuery, SCSS, Docker, SFTP, PDF/Excel export*

---

### Personal Website

<https://vodongha.id.vn>

Personal website built with Blazor Web App .NET 10 and PostgreSQL. Auto-deployed to Fly.io via GitHub Actions, SCSS dark theme.

*Blazor, .NET 10, PostgreSQL, SCSS, Fly.io, Docker*

---

### Travel Mate

<https://play.google.com/store/apps/details?id=vn.trippo.mate>

Group-trip planner & shared-expense manager — timeline, transport, lodging, planned vs actual budget, a shared fund and multi-currency who-owes-whom settlement. Spring Boot 3 / Java 21 + Oracle ADB backend; Flutter app (Android + Web) with FCM push notifications.

*Spring Boot, Java, Oracle ADB, Flutter, Dart, Firebase FCM, Fly.io*
